*Std. Panel Width 60"

Class II - 6" Thick 82 lbs. per sq. ft.
*Std. Panel Width 48"

*NEW

Class III - 9" Thick 125 lbs. per sq. ft.
*Std. Panel Width 36"

*NEW

The original Modular Vault Panel custom, solid, sturdy protection.

*Smaller panel widths available at additional cost, consult sales for details.

VSI - ONE FOR THE AEGVS

When security at the highest level is required, VSI provides the answer.

The Aegvs panels are the benchmark of modular vault panels that VSI has been producing for decades. The concrete panels are manufactured from a combination of concrete products and security fibers enclosed within an electrostatic coated metal frame. The construction of the panels incorporates a lap design to eliminate any potential gaps; providing greater security at the seams. The panels are designed to fit together onsite to create a custom vault system specific to the customer's size requirements and design specifications.

VSI's manufacturing methods meets the strict requirements of Underwriter's Laboratory Safety Standard, U.L. 608. The VSI staff is known for their expertise in building some of the most unique shaped vaults without compromising the integrity of the vault system. Our one of kind fabrication process does not require the use of molds to form the individual vault panels. This concept puts VSI at the forefront of the security industry, allowing us to accommodate almost any vault design possible.

VSI will cohesively work with your architects, designers, and engineers throughout the fabrication process to ensure all requirements are met. Delivery and installation services are provided by our experienced teams to provide a total solution.

Manufacturer reserves the right to change product specifications without notice.

AEGVS SERIES PANELS

Safety, Strength & Dependability

VSI's Aegvs series panels, the original panels that have taken us to the top of the physical security industry.

VSI - WHY CHOOSE AEGVS?

Simple – Aegvs series panels are the Benchmark of Modular Vault Panels that VSI has been producing for decades. Maximize your security and piece of mind with our UL Listed concrete panels. The original VSI innovative standard in modular vault panels.

TOP FEATURES

- U.L. Rated: Class M, Class I, Class II, and Class III
- Panels are made with concrete core
- Sides are constructed of electrostatic coated metal, both surfaces are concrete with inside smooth and exterior side brush finish.
